- 1:185 from m = 15.2m / 50 feet

Notes on Sources
This map is based on Sanborn Fire Insurance Company maps produced at intervals between 1911 and 1912. The dates shown at the edge of the map and set apart by dotted section lines indicate the year in which the underlying Sanborn data was compiled.

Additional map data come from city building permit records, city directories, entertainment trade journals, and newspaper advertisements.
